CACE Technologies Announces GSA Schedule Listing

Government Reseller Partner brings CACE Pilot, Shark Appliance to the Federal Marketplace

Davis, CA – (May 12, 2010) – [CACE Technologies](#), hosts of the [Wireshark](#) open source project and developers of software that enhances the Wireshark user experience, today announced that its' federal government reseller partner, [Conquest Security](#), has finalized the process for adding the CACE family of products to GSA Schedule 70. The Contract Number is GS-35F-0842R. Buyers for federal agencies now can easily access GSA pricing for [CACE Pilot](#), [AirPcap](#), [TurboCap](#), and the [Shark Appliance](#) through GSA Advantage, the online marketplace for GSA Schedule products and services.

“In our pre-launch plans for the Shark Distributed Monitoring System, we searched for a knowledgeable partner in the federal government space that could introduce the SDMS product family and all of our technology to the vast number of potential customers there” states John Bruno, CACE Technologies CEO. “Conquest Security was recommended to us, and has proven to be a solid marketing force and advocate. They helped lead us through the maze of the government procurement process and applied their expertise to add our products to their GSA Schedule. Placement on this schedule is a major advantage for our business.”

“Network and Information Security engineers from nearly every federal government agency use Wireshark as their network and protocol analyzer of choice”, said Mark Williamson, Conquest Security CTO. “CACE Technologies has responded to the requirements of the market by providing excellent commercial support and advanced systems for distributing the power and flexibility of Wireshark to the entire networking infrastructure.”

Acknowledged as the world’s most popular and widely-deployed analyzer, Wireshark enjoys over 500,000 downloads per month.

About GSA Schedules and Contracts

The use of the GSA schedule system as a quick, efficient buying mechanism for federal government agencies is steadily increasing. Today, GSA schedules are the favored purchasing mechanism for most federal buyers and an ideal sales and closing vehicle for vendors.

About Conquest Security

Conquest Security is an information security consulting firm serving government and commercial enterprise organizations. Our holistic approach to information security emphasizes good systems management, automated security controls, continuous testing, and education. Our goal is to help our clients focus on their greatest information security risks, defend against attacks and exploitations, improve systems availability and resiliency, and reduce costs. Founded in 2005 and based in Gaithersburg, Maryland, Conquest Security is an **SBA 8(a)** Certified Business. For more information, visit www.conquestsecurity.com.
